
EDUCATION

B.Tech - Computer Science Engineering
Indira Gandhi Delhi Technical University for Women (IGDTUW), Delhi
2024 - 2028

INTERNSHIP / TRAINING

AI-Powered Full Stack Development , IGDTUW **June–July 2025**
Worked on frontend (HTML, CSS, JavaScript) and backend fundamentals with exposure to AI/ML concepts including supervised and unsupervised learning. Built small functional modules as part of practical training.

Full Stack Web Development with AI Training , Internshala **June–July 2026**
Completed training covering HTML, CSS, Bootstrap, JavaScript, DOM, React, PHP and DBMS with AI-assisted development. Explored next-generation AI tools and AI integration for projects and was recognized as a Top Performer.

WORKSHOP

Mobile Application Development , IGDTUW
Gained hands-on exposure to Android app development, UI/UX design principles, and API integration concepts through guided implementation tasks.

PROJECTS

StayNest , Full Stack Web Application , [Live Demo](#) | [GitHub](#)
Developed a full-stack student accommodation platform for finding and managing PGs, hostels, flats and rental rooms. Implemented authentication, property CRUD operations, image uploads, search and filtering, wishlist and personalized dashboards using PHP and MySQL.

AI Marketplace Assistant , Web Dashboard (JavaScript, AI Integration) , [Live Demo](#) | [GitHub](#)
A hackathon prototype designed to support local artisans through AI-powered poster generation, promotional content creation, and intelligent price suggestions. Focused on building a simple, accessible dashboard to bridge traditional craftsmanship with digital tools.

Virus Survival , Browser Game (HTML, CSS, JavaScript) , [Live Demo](#) | [GitHub](#)
Developed an interactive browser-based survival game using HTML, CSS and JavaScript with BFS-based AI hints for safer path navigation. Implemented dynamic obstacles, hazards, score tracking, timers, power-ups and interactive gameplay.

Student Management System | Python, MySQL | [Live Demo](#) | [GitHub](#)
Developed a Student Management System with CRUD operations to add, update, delete, and search student records. Managed database tables and performed SQL queries for efficient data handling.

SKILLS

Languages: C++, Python, JavaScript, PHP, Java, Kotlin
Frontend: HTML5, CSS3, Bootstrap 5, React.js
Backend: Node.js, Express.js, PHP, REST APIs
Databases: MySQL, MongoDB
AI & Development: AI Integration, AI-Assisted Development
Tools: Git, GitHub, VS Code, Android Studio, Arduino IDE, Keil µVision, Postman, XAMPP, phpMyAdmin
Problem Solving: Data Structures & Algorithms, LeetCode

CERTIFICATE

- Full Stack Web Development with AI - Top Performer, 2026
- AI-Powered Full Stack Development Internship - IGDTUW (2025)
- Mobile Application Development Workshop - IGDTUW (2025)
- Gen AI Exchange Hackathon 2025 (AI-Powered Marketplace Assistant) - Google Cloud & Hack2skill (2026)
