INTERNSHIP

AI-Powered Full Stack Development , IGDTUW

June–July 2025

Worked on frontend (HTML, CSS, JavaScript) and backend fundamentals with exposure to AI/ML concepts including supervised and unsupervised learning. Built small functional modules as part of practical training.

WORKSHOP

Mobile Application Development , IGDTUW

Gained hands-on exposure to Android app development, UI/UX design principles, and API integration concepts through guided implementation tasks.

PROJECTS

Class Sync , Android App (kotlin)

An Android-based academic management application enabling structured unit-wise organization of subjects, notes, and syllabus. Integrated email authentication and group-based collaboration with shared PDF/PPT resources using Room Database for persistent storage.

Virus Survival , Browser Game (HTML, CSS, JavaScript)

Developed an interactive browser-based survival game featuring dynamic obstacles, AI-powered hints, and real-time score tracking. Implemented DOM manipulation, event handling, and custom game logic to enhance user engagement and strategic navigation.

AI Marketplace Assistant 🧠, Web Dashboard (JavaScript, AI Integration)

A hackathon prototype designed to support local artisans through AI-powered poster generation, promotional content creation, and intelligent price suggestions. Focused on building a simple, accessible dashboard to bridge traditional craftsmanship with digital tools.

Smart Home Automation , IoT Model (ESP32, Blynk)

Designed an IoT-based smart home system integrating rain and gas sensors for automated rooftop control, ventilation management, and AQI alerts. Developed a web application with remote monitoring and control features using ESP32-CAM for real-time surveillance and enhanced safety.

Student Management System | Python, MySQL

Developed a Student Management System with CRUD operations to add, update, delete, and search student records. Managed database tables and performed SQL queries for efficient data handling.

SKILLS

Web Development : HTML, CSS, JavaScript

Backend & Full Stack (Basics) : Node.js

Mobile Development : Kotlin (Basic) , UI/UX

Programming Languages : C, C++

Soft Skills : Problem Solving, Teamwork, Communication

CERTIFICATE

- AI-Powered Full Stack Development Internship – IGDTUW (2025)
- Mobile Application Development Workshop – IGDTUW (2025)
- Gen AI Exchange Hackathon 2025 (AI-Powered Marketplace Assistant) – Google Cloud & Hack2skill (2026)

EDUCATION

B.Tech – Computer Science Engineering , IGDTUW
2024 – 2028
